SHORTENED STATUTO	RY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE	
3 MC	ONTHS	01/05/2007	PAPER	

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

A	Application No.	Applicant(s)				
	10/040,538	PACETTI ET AL.				
Office Action Summary	Examiner	Art Unit				
	Erma Cameron	1762				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 13 O	ctober 2006.					
2a)⊠ This action is FINAL . 2b)□ This	a) This action is FINAL . 2b) This action is non-final.

DETAILED ACTION

Response to Amendment

Election/Restrictions

1. Claims 7, 12, 14, 37-40, 42-43, 47 and 61-70 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: they are independent or distinct as discussed previously, and as acknowledged by the applicant in the 10/13/2006 response. In addition, it is a burden for the examiner to consider as many species as the applicant would like. In addition, the applicant is reminded that elections were made on 3/24/2004 and 7/02/2004 WITHOUT traverse.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 7, 12, 14, 37-40, 42-43, 47 and 61-70 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Application/Control Number: 10/040,538

Art Unit: 1762

Claim Rejections - 35 USC § 102

2. Claims 1-6, 11, 13, 17-19, 21-24, 33-36, 44, 46, 48-54, 57-60, and 71-72 are rejected under 35 U.S.C. 102(e) as being anticipated by Castro et al. (US 6,395,326).

Examiner maintains the rejection of the previous office action for claims 1-6, 11, 13, 17-19, 21-24, 33-36, 44, 46, 48-54, 57-60 and 71-72.

Claim Rejections - 35 USC § 103

3. Claims 9-10, 15-16, 20, 25-26, 41, 45, 55, 56 and 73-78 are rejected under 35 U.S.C. 103(a) as being unpatentable over Castro et al.

Examiner maintains the rejections of claims 9-10, 15-16, 20, 25-26, 41, 45, and 55-56 for the reasons outlined in the previous office action.

Examiner adds claims 73-78 to this rejection, as necessitated by amendment. The anhydrous gas of Castro would be inclusive of argon and nitrogen. The T of claim 76 is inclusive of room temperature, and the T of claim 77 is only slightly above room temperature.

4. Claims 1-6, 9-11, 13, 15-26, 33-36, 41, 44-46, 48-49, 51-58, 60 and 71-78 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ding et al. (US 6,358,556) in view of You et al. (US 6,407,009).

Page 4

Examiner maintains the rejection of claims 1-6, 9-11, 13, 15-26, 33-36, 41, 44-46, 48-49, 51-58, 60 and 71-72 (mistakenly written as 70-71).

Examiner adds claims 73-78 to this rejection. You teaches heated or cooled inert gases to adjust the evaporation of a coating from a substrate, depending on how volatile the solvent is (5:37-40; 7:52-8:11).

Response to Arguments

5. Applicant's arguments filed 10/13/2006 have been fully considered but they are not persuasive.

Castro:

The applicant has argued that Castro does not teach heated gas. The examiner disagrees. Castro teaches air pressure to deliver the coating, including bursts of air pressure (9:26-37), and also teaches a heating assembly 52 with a heating nozzle 56 to control the drying of the coating (11:11-53).

Ding and You:

The applicant has argued that Ding fails to teach directing a gas onto the stent. The examiner disagrees. Ding teaches coating a stent using an air brush device (3:47-58). The applicant has also argued that there is no motivation to combine Ding and You. The motivation to combine is to add the controlled drying aspects of the You invention to the Ding process, not

Application/Control Number: 10/040,538

Art Unit: 1762

to "correct" conformity of the Ding coating. The applicant has also argued that the two references teach away from each other. The examiner disagrees in that only certain aspects of the You process (that is, the control of the drying by adjusting the T of the gas blown onto the coating, depending on the volatility of the solvent being used) are being added to the Ding process, and the fact that Ding has open lattice work and You does not is immaterial to the combination. The applicant has also argued that You only teaches the application of a cooled gas to inhibit the solvent evaporation. The examiner strongly disagrees. You teaches either cooling the gas or heating the gas, depending on the volatility of the solvent being used (7:52-8:11) (8:5-7: "Conversely, for solvents which are not as volatile as naphtha or methylisobutylketone, a higher temperature in the chamber can be advantageously used without an undesirably high rate of evaporation.").

Page 5

Declarations under 37 CFR 1.132

6. The Declarations under 37 CFR 1.132 filed 10/13/2006 is insufficient to overcome the rejection of claims 1-6, 9-11, 13, 15-26, 33-36, 41, 44-46, 48-60 and 71-78 based upon 6395326 as set forth in the last Office action because: the declarations offer no substantive reasons for their statements that 6395326 does not teach each of the independent claims, and are merely opinion.

Application/Control Number: 10/040,538 Page 6

Art Unit: 1762

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erma Cameron whose telephone number is 571-272-1416. The examiner can normally be reached Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Meeks can be reached on 571-272-1423. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
